introducing

AI for juniors

by elyst AI

May Batch

a 5-day program where your child will *build* with AI in just **5 days.**

This summer, your child has a *choice.*

elyst AI

SCROLL. WATCH. FORGET.

OR

Completely Online

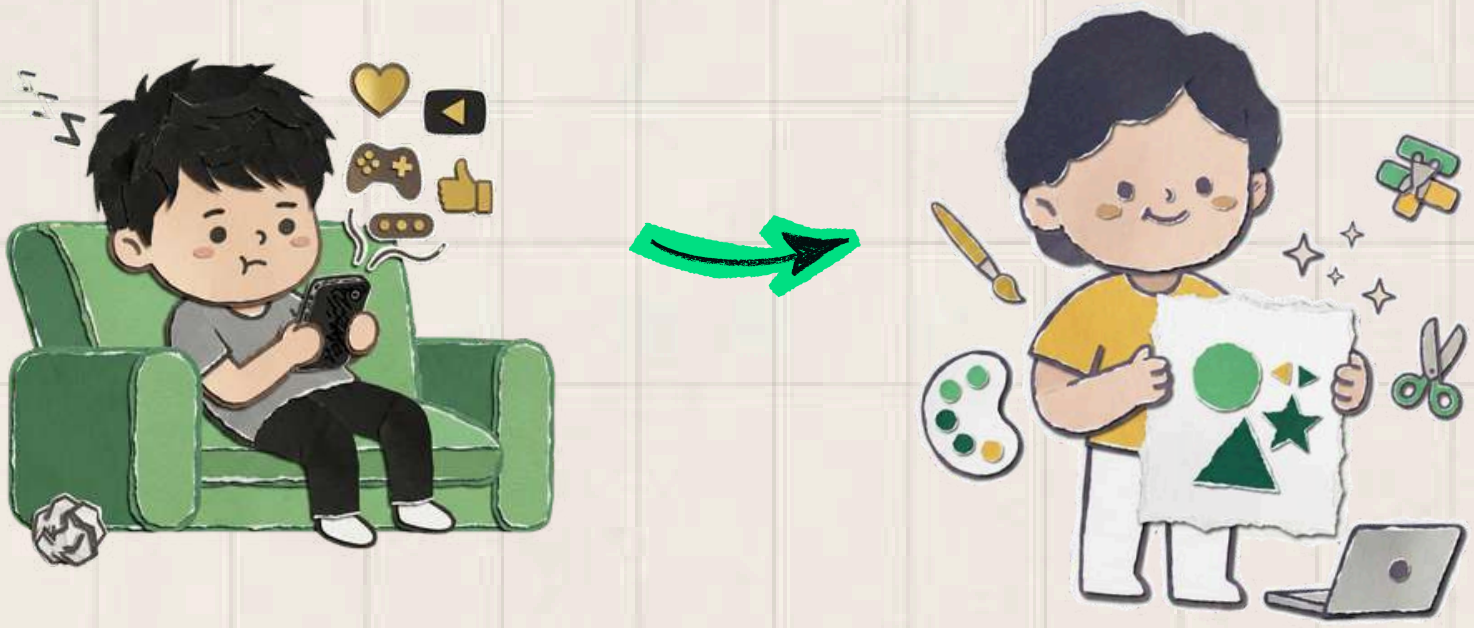
Perfect for Classes 5-10 Students

Build a poster.
Compose a song.
Create a video.
Create a website.

All using AI. In just *5* days

This is not a theory class. There are no boring slides or long lectures.

From Day 1, your child use AI tools, talk to them, experiment and actually create with them.



What they will *build*

elyst AI

By the end of the program, every student will have created real projects using AI.

In 5 days, your child will create these 5 real projects:-

- Poster
- Song
- Video
- Website
- Study System

What happens *day by day!*

elyst AI

DAY 01 — First conversation with AI. Understanding what it is and how to talk to it effectively.

DAY 02 — Learning to prompt. How to ask AI the right way and get the right results. Step into creative AI by composing a song.

DAY 03 — Creative day. Where they design a poster and generate a video all with AI.

DAY 04 — Study smarter. Use AI to understand concepts, make notes, and revise better.

DAY 05 — Build, develop and publish their own website from scratch.

but why?

AI for juniors

by elyst AI

Live + Recorded sessions.

Every session happens live. Your child can ask questions, get stuck, and get help in real time.

Bilingual - Malayalam + English

Every concept explained in both languages.
Your child never feels lost because of language.

Small batch. Real attention.

Not a webinar with 100 students.
Every child is seen, heard, and helped.

Not just a certificate.

A poster. A song. A video. A website. A study system.
Things they built. Things they can show.

Morning & Afternoon batches.

10 - 11.30 AM or 2 - 3.30 PM.
Pick what works for you!

Who is the *mentor?*

She holds a BTech in Artificial Intelligence and is among the first generation of AI graduates in India.

She co-founded Elyst AI, a company that builds AI systems for businesses.

This is not a side project for her.
AI is her work, her business and daily life.

Fathima Shirin P

She has trained *2000+* students across *30+* live sessions.

AI for Juniors is her way of bringing that same depth of knowledge to school students, at a price every family can afford.

About elyst AI

Elyst AI is not an ed-tech startup that sells courses.
We are an AI company.

We build AI systems for businesses. We consult. We implement. We automate. AI is not something we teach on the side, it is what we do every day, for real clients, with real results.

When we teach, we teach from the inside.
Not from a textbook. Not from a YouTube playlist.

From actual experience of using AI to build things.

AI for Juniors is that same knowledge, simplified, structured, and made accessible for school students.

What *now?*

elyst AI

By the end of the program, every student will have created real projects using AI.

₹999

Limited seats!

Your child's future with AI starts *here!*

Your questions *answered*

elyst AI

My child has never used AI. Is this okay?

Perfect, actually. The program starts from zero. Day 1 is literally the first conversation with AI.

Are the sessions recorded?

Yes. Every session recording is available for 1 month so your child can revisit anything they missed or want to practice again.

What language are the sessions in?

Malayalam and English. Your child can ask questions in whichever language they are comfortable with.

Is ₹999 really the full amount?

Yes. One payment. Nothing else.
No software to buy. No hidden fees.

My child is busy some days. Can they manage?

Each session is only 90 minutes. Morning or afternoon, pick the batch that fits your schedule.

My child is in Class 5. Is this too advanced?

Not at all. The program is designed for Class 5 to Class 10 students. No technical / coding knowledge needed.

How do I register?

WhatsApp us at +91 96332 88931 or fill the registration form at elystai.com/ai-for-juniors. We will confirm your seat.
